**Day 41.** The first nervous reflexes appear.

**Week 5.** The skeleton and muscles are formed.

**Week 7.** The eyes, ears, nose, and mouth can be distinguished on a child's face.  
Electromagnetic impulses sent by a child's brain can be registered.

**Week 10.** The further development consists only in the improvement of the existing organs.

**Week 26.** A child born at this time stands the chance of survival.
